Re: Sugar cost for budget planning

For the purpose of next season's budget estimates, please note that sugar has, over the past year, cost us approximately 2.10 kronor per kilogram, regardless of the quantity ordered. Kindly use this figure until an updated quotation is received from the mill.

We understand that the mill will be issuing a new price list ahead of the autumn negotiations; production planning should confirm the current terms directly with the mill's sales office before finalizing any contract.
